

AMENDMENTS TO THE CLAIMS

Please amend claims 1, 7 and 9, and cancel claim 6 without prejudice, such that the status of the claims is as follows:

1. (Currently amended) Pillow system for preventing snoring, characterized in that the pillow system comprises at least a basis element made of foam [[foram]] rubber, polyurethane foam, polyether foam or a comparable foam product, an adjustable pillow fitted onto the basis element and a cover for enclosing the basis element and the adjustable pillow, wherein the basis element is at least substantially flat, and the adjustable pillow is in a longitudinal cross section at least substantially wedge-shaped.
2. (Original) Pillow system according to claim 1, characterized in that the adjustable pillow is an inflatable pillow.
3. (Original) Pillow system according to claim 2, characterized in that the basis element is provided with a depression, under operational condition transverse positioned to a user, which at least partly encloses the inflatable pillow.
4. (Original) Pillow system according to claim 3, characterized in that on one side the basis element is provided with a flap made of foam rubber, polyurethane foam, polyether foam or a comparable foam product and that under operational conditions the flap is positioned on top of the inflatable pillow.
5. (Original) Pillow system according to claim 3, characterized in that the basis element is made of a relatively high density foam rubber, polyurethane foam, polyether foam or a comparable foam product and the flap of relatively low density foam rubber, polyurethane foam, polyether foam or a comparable foam product.

6. (Canceled)

7. (Currently amended) Pillow system according to claim 1 [[6]], characterized in that the adjustable pillow comprises a number of layers made of a relatively high-density foam rubber, polyurethane foam, polyether foam or a comparable foam product.

8. (Original) Pillow system according to claim 7, characterized in that at least one layer is in a longitudinal cross section at least substantially wedge-shaped.

9. (Currently amended) Pillow system according to claim 1 [[6]], characterized in that the top side of the pillow system is provided with a layer made of a relatively low density foam rubber, polyurethane foam, polyether foam or a comparable foam product.

10. (Previously presented) Pillow system according to claim 1, characterized in that the cover is made of an elastic material and can be placed around the other constituent parts of the pillow system.
